Location: Jamshedpur, Jharkhand, India

Professional Summary

Results-oriented MCA graduate with experience in mobile application development, REST API integration, IoT systems, and website development. Strong understanding of SDLC, database management, and application testing. Seeking an entry-level Software Developer role to contribute technical and problem-solving skills.

Education

Master of Computer Applications (MCA) 2023 – 2025
Birla Institute of Technology, Mesra CGPA: 7.78/10

Bachelor of Computer Applications (BCA) 2020 – 2023
Birla Institute of Technology, Mesra CGPA: 9.07/10

Higher Secondary (12th) 2019 – 2020
Jamshedpur Co-operative College, JAC Percentage: 62.5%

Diploma (Mechanical Engineering) 2015 – 2018
Sant Longowal Institute of Engineering & Technology, Punjab Percentage: 53%

Secondary (10th) 2014 – 2015
R.M.S High School, Balichela, JAC Percentage: 74%

Technical Skills

Programming: Python, Java (Basic), C (Basic)
Frontend: HTML, CSS, JavaScript, React Native, React.js
Backend: Python (Flask/FastAPI), REST API Development
Databases: MySQL, InfluxDB
Tools: Git, GitHub, Postman, MQTT, Streamlit
Concepts: OOP, SDLC, API Integration, Automation Testing

Experience

Pcs Global Pvt Ltd, Kolkata **Aug 2025 – Nov 2025**

- Contributed to the development of an IoT-based Weather Station using Arduino and environmental sensors for real-time monitoring.
- Implemented MQTT-based communication for transmitting sensor data to cloud/server.
- Assisted in basic dashboard integration and testing of real-time data visualization modules.

Micronix System Pvt Ltd, Kolkata **Nov 2025 – Present**

- Developed a **Fish Market Management Mobile Application** using **React Native** and **Python backend**, implementing modules for vendor management, product listing, and order processing.
- Developed and integrated RESTful APIs; performed API testing using Postman for validation and debugging.
- Conducted manual and basic automation testing to ensure application stability and performance.
- Independently designed and developed complete websites including **ALLign** and **Mewar Marble**, implementing responsive layouts, UI/UX improvements, performance optimization, and client-requested enhancements.

Internship

RailTel Corporation of India Ltd **Feb 2025 – Jun 2025**
IoT-Sensor Visualization Intern Pune, India

- Developed a real-time dashboard using Streamlit to visualize IoT sensor data via MQTT.
- Integrated InfluxDB for time-series storage, OpenWeather API for weather insights, and implemented secure login with automated alert systems.

Tata Steel Ltd **May 2024 – July 2024**
Calibration Due Date Monitoring System Intern Jamshedpur, India

- Developed a system to send calibration due-date alerts using SMTP-based email notifications.
- Designed a secure dashboard with a centralized database to track calibration history and schedules.

Project

IoT-Based Weather Station

Technologies: Arduino, MQTT (HiveMQ), InfluxDB, React.js, Raspberry Pi

- Designed and developed a real-time IoT-based weather monitoring system to collect environmental data.
- Implemented MQTT protocol for real-time sensor data transmission.
- Integrated InfluxDB for time-series data storage and monitoring.
- Developed a responsive web dashboard using React.js for real-time data visualization.
- Enabled remote monitoring and basic automation features using Raspberry Pi.

Certifications and Achievements

- Google IT Automation with Python
- JP Morgan Chase & Co. (Virtual Experience in Software Engineering)
